Intelligent Innovation

A SINGULAR ADVANTAGE

How your grain is stored can make all the difference to your bottom line. The EXTRON AgTECT Gateway controller is the only wireless grain management and hazard monitoring system that gives you all the information you need – all from one source. A single EXTRON AgTECT Gateway controller provides real-time, actionable information from all of your storage facilities on-site to ensure optimal conditions for your grain and equipment.

One EXTRON AgTECT Gateway can simultaneously monitor:

- Bins
- Silos
- Ground Piles
- Round Piles
- Buildings
- Flats
- Bunkers
- Equipment

CONNECT.

Know what's happening when it's happening. The EXTRON AgTECT Gateway delivers real-time information of grain condition and equipment on location or anywhere you are through an internet enabled device and customizable interface. The system can easily expand to include additional storage facilities and equipment. Plus, users can also connect existing sensors, saving you time and money.

The EXTRON AgTECT Gateway delivers:

- Real-time grain condition information
- 24/7 Alerts
- Updates
- Customizable interface
- Remote fan control
- Equipment monitoring
- Historical trends
- Smart Sensor technology

DETECT.

Prevent damage and spoilage before it happens while reducing energy use. The EXTRON AgTECT Gateway grain and hazard monitoring system means you'll always have the right information at the right time, alerting you with critical information through Smart Sensor Technology.

The EXTRON AgTECT Gateway monitors grain storage facilities and equipment for:

- Temperature
- CO₂/Humidity
- Differential pressure
- RPMs
- Watts
- Current
- Power loss
- Wind speeds
- Bearing temperatures
- Alignment temperatures

PROTECT.

Be proactive in protecting grain quality and equipment issues with the EXTRON AgTECT Gateway, managed directly from your smart phone or computer. Don't wait for something to happen when you can prevent it.

Just one EXTRON AgTECT Gateway helps protect against:

- Heat
- Moisture
- Humidity
- Pests
- Bin level
- Equipment malfunctions
- Unnecessary energy use
- Power loss
